First Round Logo Designs

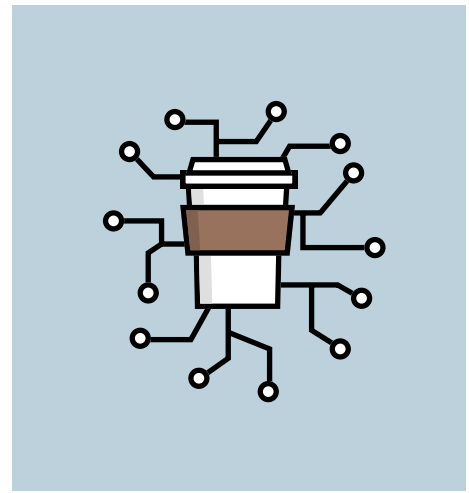

Coffee&Coding

Concept One: Neural Network + Coffee Cup

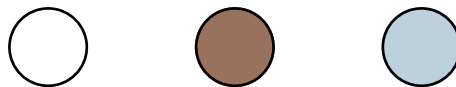

White Background

Blue Background

Colour Palette

I think a neural network is a strong visual + allows you to do lots of interesting things. Paired with the flat icon cup, it implies energy and connection coming from the coffee; an ode to the blend of coding and coffee!

Would look really good on a business card or t-shirt. Could also be paired with type.

Concept Two: Retro Computer

White Background

CODING.
COFFEE

CODING.
COFFEE

Beige Background

CODING.
COFFEE

Colour Palette

This concept is intended to capture the idea that coding is for everyone, by harking back to a simpler age of computing. It's simple + immediately recognisable, and feels friendly.

Lots of room also for customisation + characterisation of the icon!

Concept Three: Coding Symbols Coffee

Curly Bracket v1

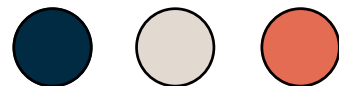

Curly Bracket v2

Square Bracket

Colour Palette

Played around with coding symbols to make coffee related shapes for a while, and think these work quite well! Also inspired by Portland style, industrial coffee labels + colours, could make some really cool badges + decals with this concept.

Concept Four: Splashing Cup

Black and White

**COFFEE
AND 
CODING**

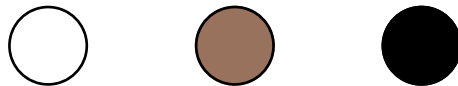

Black White Brown

**COFFEE
AND 
CODING**

Spilling Cup

**COFFEE
AND 
CODING**

Colour Palette

This one is focused more on the typography, a bold, strong font. The illustration focuses just on the coffee aspect, but I think overall it makes for a strong visual.
